Core Java

J2EE

Spring Boot

SQL

REST APIs

Java Data Structures & Algorithms

Git

IntelliJ

Postman

MySQL

PROJECTS

Backend Banking Application

Developed a secure and user-friendly online banking system using Java and Spring Boot. Designed a MySQL database with tables for user details, account information, and transaction records. Implemented features such as user authentication, online fund transfers, balance checks, and transaction history retrieval. Utilized JSON Web Tokens (JWT) for secure authentication.
